

HABONIM UPDATE

Update 01 / 7.2010

H24 HIGH - PRESSURE VALVES NOW FIRE - SAFE APPROVED

Intensive tests performed on the H24 High-Pressure series, have resulted in a unique Fire-safe approval for instrumentation valves

Fire test

H24 valve was tested by Applus RTD Meettechniek in Netherlands and passed the Fire test

Advantages

1. Maximum working pressure of 6000 psi (413 bar)
2. Robust, 2-piece design eliminates leak paths
4. Blowout-proof stem
5. A safety pin prevents unintentional rotation of end connection

Features

- Operating temperature ranging from -28°C to 260°C (14°F-500°F)
- Available with a variety of threaded end connections
- Available construction to satisfy NACE specifications for corrosion protections
