

HABONIM'S SAFETY, QUALITY AND ENVIRONMENTAL POLICY

Quality - Habonim's policy is to provide quality products that meet customer expectations and provide complete and total satisfaction. By doing so the company maintains its position at the forefront of the national and international ball valve, and actuator markets.

Health & Safety – Habonim has raised the banner of **zero** work accidents. Management together with the entire workforce is implementing all relevant laws and regulations necessary to achieve this goal.

Environment – The management of Habonim has pledged to fulfill all relevant laws, standards, and regulations necessary to preserve the environment - at the company's site as well as our client's.

Habonim management and employees are committed to these policies.

The Company stands fully committed to the customer.

Management sees quality, safety and the "Functional Safety" of its products as primary factors for success.

Management will take any steps necessary, and assign whatever resources are required to meet these targets.

The procedures, quality systems, safety and the environment as well as the company's products will fulfill all legal requirements of all relevant standards, both nationally and internationally, as well as the standards of the customer.

Habonim will implement its' policy by;

- The allocation of resources
- The training of management and employees to safety, quality, and environmental awareness.
- The continuous improvement of processes and products and preventing non-compliance in all areas.

The company strives to enhance the partnership between management and the workers in order to increase awareness, and to recognize the commitment to the safety and quality of the products and processes with which they have been charged. The company will instruct and train employees as required by the standards:

**Directive 94/9/EC, ISO 9001, CAN/CSA – N285.0, IEC 61508-2:2000,
PED 97/23/EC, EN 13980, ISO 14001, OHSAS18001**

The management of Habonim is working to maintain, and monitor these goals and objectives; improving processes and products, safety and the environment, and will establish methods for continuous enhancement based on these indicators.
