

# TuBore™ clean valves

## Introduction

### 48 series - the TuBore™ line

The TuBore™ series is Habonim's line of sterile ball valves for the pharmaceutical, bioprocessing, food and beverage industries. The valves comply with ASME BPE standard for applications in which sterility, cleanability and drainability are essential for product quality.

Because the TuBore™ valve port diameter is identical to the tube inner diameter, no expansion or contraction can take place inside the system resulting in full drainage and no traces that could cause contamination. The TuBore™ line excels at maximum flow capacity and minimum pressure drop and provides low-torque tight shutoff.

The TuBore™ series is grouped into three geometric designs according to the ASME BPE, ISO 1127 and DIN 11850 tube dimension specifications.

Only FDA and USP Class VI compliant polymers or elastomers are used in the TuBore™ series.

To avoid rouging on austenitic stainless steel surfaces and corrosion attack on welding areas, low ferrite cast or forged bar materials are used and polished. Upon request, electro-polished surface finishes are available.

Purge and drain ports are available upon request to facilitate CIP/SIP operation.

Diverter and various multiport configurations based on the TuBore™ model are also available.

## Technical summary

<b>48 series</b>	TuBore™
<b>Size range</b>	3/8" - 6 (DN10 - DN150) Series depended
<b>Pressure range</b>	Vacuum 10 <sup>-6</sup> Tor to 50 bar (750 psi)
<b>Temperature range</b>	-60 °C to +230 °C (-76 °F to +446 °F)
<b>Materials</b>	Stainless steel A351 CF3M, A479 316L, EN 10222-5 1.4435, Alloy C22, Alloy C276
<b>End connections</b>	Welded, clamped
<b>Operation</b>	Lever or gear operated, pneumatic or electric actuation
<b>Service</b>	Pharmaceutical, bioprocessing, cosmetics, food & beverage

## Standards of compliance

<b>Factory certification</b>	ISO 9001-2008	Quality management system
<b>Valve design &amp; tests</b>	ASME BPE	Valve design
	ISO 1127	Stainless steel tubes - Dimensions and tolerances
	DIN 11850 (Range 2)	Stainless steel tubes - Dimensions and tolerances
	EN 12266-1, API 598	Testing of metallic valves - Pressure tests, test procedures and acceptance criteria.
	API 607, ISO 10497	Testing of valves - Fire type-testing requirements
<b>Certifications</b>	ISO 15848-1	Industrial valves - measurement, test and qualification procedures for fugitive emissions
	PED 2014/68/EU Module H	Pressure equipment directive
	ATEX 2014/34/EU	Equipment and protective systems intended for use in potentially explosive atmospheres (optional for actuated unit only)
<b>Documentation</b>	EN 10204 2.2 / 3.1 / 3.2	Metallic materials - types of inspection documents

### Polishing and Electro-polishing

To minimize contamination and to avoid corrosion/roughing problems, inner surfaces which come into direct or indirect contact with the flow media are polished and, upon request, electro-polished.

For cast/forged valves the body, ball, seat retainer (2" size and above) and the end connections are polished internally. For rolled bar valves, additional polishing is carried out the body and end connections outer surfaces.

When requested, electro-polishing is carried out on the body, ball, seat retainer (2" size and above) and end connections.

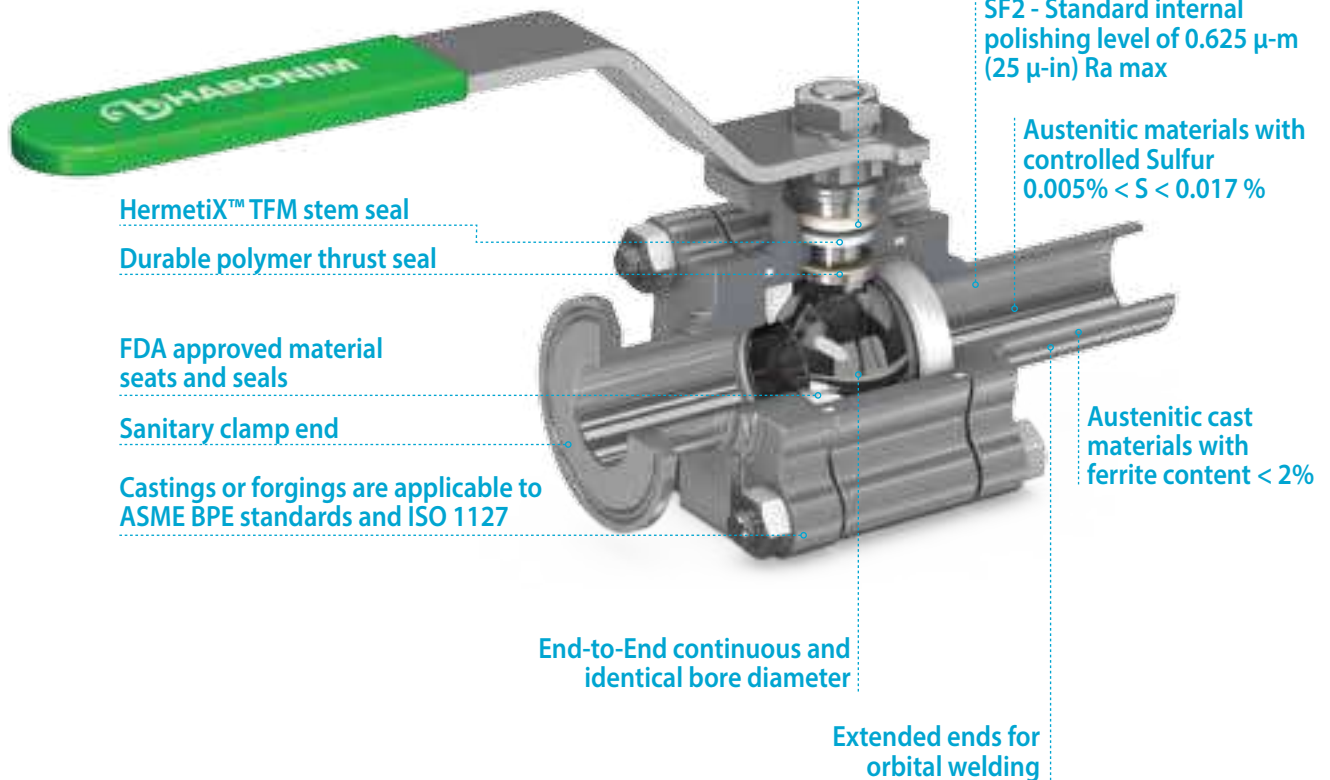

The standard TuBore™ line polishing level is 0.625 μ-m (25 μ-in) Ra max. Higher levels of surface finish up to 0.375 μ-m (15 μ-in) Ra max are available, including internal and external electro-polishing.

Habonim does not use Animal Derived Ingredients (ADI's) in its surface finishing processes.

Ra Reading for Metallic Contact Surfaces			
Product			
ASME BPE	Ra Max.		Habonim
Surface designation	μ-in.	μ-m	Code
SF1	20	0.51	G32
SF2*	25	0.64	G24
Mechanically Polished and Electropolished			
ASME BPE	Ra Max.		Habonim
Surface designation	μ-in.	μ-m	Code
SF4	15	0.38	E32
SF5	20	0.51	E24
SF6	25	0.64	E18

\* SF2 is the TuBore™ line standard surface finish, no need to add 'G24' suffix

### 48X series TuBore™ with ISO 15848-1 certified stem seal

-----------------------------	----------------	-------------------	-------------------	--------------------	----------------------

## Austenitic ferrite content

To avoid rouging on austenitic stainless steel surfaces and corrosion attack on welding areas, low ferrite cast or forged bar materials are used. The standard TuBore™ cast valves have a ferrite level of < 2%, and the TuBore™ forged bar valves < 1%.

## Effect of sulfur % on orbital welds

Orbital welding provides precise control of the arc gap and thus better control of the heat input, allowing for uniform penetration. Orbital welds are typically carried out as a single-pass weld using a square-butt end preparation. The TuBore™ one-piece, solid, extended welded ends are accurately machined and designed with sufficient length to allow free movement of the orbital welding machine around the circumference. The result: a quality weld and minimum labor time. For critical applications using small-diameter, thin-walled tubing, low-sulfur materials with sulfur concentrations of 0.001-0.005% are routinely and successfully welded, including allowances made for higher weld bead width-to-depth ratio. However, the more complex welding procedures and the specialized personnel required to achieve these exceptional surface finish and corrosion resistance specifications involve extra costs. Thus the standard Habonim's TuBore™ 316L/CF3M welded ends have a controlled sulfur content of 0.005-0.017%.

## 48G series - Graphite-free fire safe design valve and ISO 15848-1 certified valve

### Cleaning and Assembling

Habonim's meticulous cleaning, assembly and inspection procedure for the TuBore™ line ensures the stringent cleanliness required by Bioprocessing, Pharmaceutical and Oxygen services.

Habonim uses a state of the art, environmentally friendly, alkaline-based automatic degreasing system with multiple stages of cleaning, rinsing and drying chambers to ensure that particles, grease, metal chips and other contamination hazards that can be introduced by a poor deburring process or shop dirt are removed thoroughly before the assembly process begins. Upon completion of the cleaning process, the valves are assembled in an oil free restricted area by qualified personnel who are specially trained to perform this task. The employees wear clean working clothes and latex gloves throughout the procedure. The equipment and tools are cleaned before use and the work surfaces are covered with a clean polyethylene sheet before performing the valve assembly.

### Testing and packaging

All valves are 100% helium leak tested according to the EN 1779 vacuum test method - A.3 Leakage  $\leq 1E-6$  Pa\*m<sup>3</sup>/sec. Packaging is done in the same cleanroom where the cleaning process was completed. Finished (dry, completed, inspected and approved) valve end connections are capped with non-shedding end caps. Finished valves are removed from the cleanroom environment only after being bagged and sealed in a clean polyethylene bag.

## 48G series - External and internal polish bar made valve line, Graphite-free fire safe design valve and ISO 15848-1 certified valve

The HABONIM TuBore™ ball valve identification code

Size		
Code	inch	mm
02	1/4"	8
03	3/8"	10
05	1/2"	15
07	3/4"	20
10	1"	25
12	1 1/4"	32
15	1 1/2"	40
20	2"	50
25	2 1/2"	65
30	3"	80
40	4"	100
60	6"	150

Features	
A	Anti-Static
F	Fire safe
D	Diverter, Bottom entry
S	Diverter, Side entry
I	High purity Class 10000 assembly room
Q	Cavity filler seats
R	Flush tank
M	Ammonia service
K	Chlorine service
V	Vacuum service

Series	
48	3 piece TuBore™

Design	
	Basic design
X	HermetiX™ stem seal
G	HermetiX™ graphite-free fire safe stem seal, FDA compliant wetted parts

Body / Ends	
3	S. St. EN10222-5 1.4435 Forged
6	S. St. A351 CF3M/ A479 316L
P	S. St. A182 316L Forged
C	Alloy-C276 A494 CW-12MW
W	Alloy-C22 A494 CX-2MW

Ball / Stem	
6	S. Steel A479 316L
M	17-4PH A564 Gr 630 H1150D
C	Alloy-C276 B574 N10276
W	Alloy-C22 B574 N06022

Seat	
A	TFM
L	Virgin PEEK

Seal	
T	PTFE
G	Expanded graphite
I	Impregnated Graphite

Special features	
G..	Internal surface finish (G32)
E..	Electropolish (E24,E32)
B	Valve made from rolled bar
J2N05	Jacketed valve - Number of ports (2), type (NPT) and size (1/2")
WR	DD stem

Valve special stem seals	
HC	High cycle service
ORV	Viton O-ring based
ORB	NBR O-ring based
ORE	EPDM O-ring based

The 48 series is cleaned for pharma/API service as standard, no need for extra prefix.

In some applications the available options above are limited to specific sizes please consult with Habonim for details
